Director's Note

Many of us fell in love with Little Women (published in 1868) when we were young, reading the novel by Louisa May Alcott or watching one of the four iconic movies. Little Women has a universal theme of love, forgiveness, and family. It is also based on the real life story of Louisa May Alcott. She was a woman in a man's world struggling to get her writing published. We see Louisa in Jo. Jo states this story about a family of four girls living during the Civil War was boring. But what we find is the little things give richness to life and that is definitely not boring.

A comment about the staging: We decided to try something different for our actors and audience by placing the audience on the stage surrounding the acting area. Our actors are used to the proscenium stage where one must "cheat out." A thrust stage presents different challenges in terms of enabling the audience to see the action as well as in the set design. We have cast understudies for every role and had different configurations of the cast working together to further enhance their character development. This also gives all performers an opportunity to learn. We have enjoyed the experience of creating Little Women. We hope you do as well!
